- Other Skills: Good communication, fast self-learner, critical thinking, highly adaptive

---

PROJECTS

E-Cart (Cart for Shoes)
- E-commerce platform with features like product listings, user authentication, and payment integration.
- Built using Django Framework, PostgreSQL, and Bootstrap for responsive design.
- Repository: <u>E-Cart GitHub Link</u>

CarForAll - Car Rental and Sales Platform

- Built a robust platform for selling and renting cars using Django and PostgreSQL.
- Integrated advanced search filters, allowing users to search cars by kilometers driven, price, and other criteria.
- Designed a responsive and professional UI using Bootstrap and Sass.
- Incorporated features like WhatsApp chat, location sharing, and vehicle verification via mParivahan.
- Repository: <u>CarForAll GitHub Link</u>

Bulk Email Sender
Created a Python script to automate sending personalized bulk emails to recruiters, significantly streamlining the job application process.
- Leveraged SMTP libraries for email functionality and Pandas for managing recipient data from CSV files.
- Included resume attachment functionality and an email template for consistent communication.
- Optimized the manual process, reducing time spent on email tasks by over 80% by automating repetitive actions.
- Demo video available on <u>YouTube</u>.
