PROFESSIONAL SUMMARY

Backend developer with hands-on experience building and maintaining production Django applications. Currently contributing to ZecPath AI Platform (a live recruitment SaaS) and WinnersClubX (a production MLM platform on AWS). Delivered 41 Git commits across features including SEO endpoints, notification systems, ID verification workflows, and admin dashboards. Transitioned into software development through deliberate self-training after a decade in sales and field operations — bringing strong work ethic, adaptability, and a practical approach to problem-solving.

EXPERIENCE

Python Django Backend Developer — Intern

Zecser Business LLP · Jun 2026 – Present · Kochi, Kerala (Remote)

- Contributed 41 commits to ZecPath AI Platform — a recruitment SaaS connecting candidates, employers, and colleges
- Built public job SEO system: slug generation, job search API, and XML sitemap endpoint for search engine indexing
- Implemented job post notification system — candidates alerted automatically via Celery + Redis when matching jobs are posted
- Developed ID proof upload and verification workflow (Aadhaar & PAN PDF) with admin approval status handling
- Built employer and admin dashboard APIs: active job counts, user statistics, candidate verification endpoints
- Implemented full candidate/employer account lifecycle — self-disable with auto-reactivation, secure self-delete with goodbye email
- Fixed production bugs: cursor pagination, Redis cache invalidation, API routing errors, async email import issues
- Maintaining WinnersClubX production MLM platform on AWS EC2 — code cleanup, bug fixes, and deployment alignment
- Accessed AWS EC2 via EC2 Connect to investigate production issues, run Django migrations, and check application logs

Freelance Backend Developer

Self-employed · Dec 2023 – Present · Kochi, Kerala (Remote)

- Building and deploying full-stack applications independently using Python, Django, Flask, and React
- AutoSpeech2Text: Flask REST API + React frontend using OpenAI Whisper — deployed on Render and Netlify
- FieldOps: Django backend with JWT auth and 3-role RBAC (Admin/Worker/User), service request workflow, dashboard analytics
- Django Google Connect: Google OAuth 2.0 login with DRF endpoints, WebSocket support via Django Channels

Full-Stack Developer Trainee

Brototype · Feb 2023 – Dec 2024 · Kochi, Kerala (On-site)

- Completed intensive self-paced training in Python, Django, REST APIs, PostgreSQL, and backend development
- Built multiple full-stack projects including GreateKart (e-commerce with Razorpay & Twilio) and CarForAll (vehicle listings)
- Practiced Git workflows, clean code principles, database design, and API documentation
