PROFESSIONAL SUMMARY

Python / Django Backend Developer with 2+ years of hands-on experience building production-grade REST APIs, role-based access systems, and automation tools. Strongest project: FieldOps — a multi-role field operations management system with JWT authentication, three-role RBAC (Admin, Manager, Field Agent), and a complete service request lifecycle. Comfortable across the Django stack: DRF, PostgreSQL, ORM optimisation, third-party integrations (Google Drive API, Google Maps API), and cloud deployment on Render. Open to full-time backend roles (remote or hybrid). Fast learner, strong communicator, clean code advocate.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), Flask, JWT, RBAC, WebSockets, MVT Architecture

Databases: PostgreSQL, MongoDB

APIs & Auth: RESTful API design, Google OAuth 2.0, Google Drive API, Google Maps API

Tools: Git, GitHub, Postman, Render, Gunicorn, VS Code

Libraries: Pandas, OpenCV, PyZbar, OpenAI Whisper, smtplib, Pillow

Frontend: HTML, CSS, Bootstrap, JavaScript, React (basic)

Other: ORM optimisation, CSV/Excel processing, barcode generation (Code128, EAN-13, EAN-8), automation scripts

PROFESSIONAL EXPERIENCE

Freelance Python / Django Developer

Dec 2023 – Present

Independent · Remote · Kochi, Kerala

- Designed and deployed FieldOps: JWT-authenticated REST API with three-role RBAC (Admin, Manager, Field Agent), service request workflow (create → assign → in-progress → complete), and dashboard analytics endpoints aggregating stats by role and time period
- Built AutoSpeech2Text: Flask + React speech-to-text app using OpenAI Whisper; deployed on Render and Netlify; handled CORS, production debugging, and API integration
- Created Barcode Scanner / ParcelSort: Django parcel sorting system with OpenCV + PyZbar barcode scanning, PostgreSQL storage, and Python barcode generator (Code128, EAN-13, EAN-8)
- Developed Bulk CV Mailer: automated resume email tool with HTML templates, retry logic, and persistent send log — reduces manual job outreach from hours to under 30 seconds
- 60+ public repositories on GitHub; all projects version-controlled with clean commit history and documentation
